HTML Project

Your first client

Congratulation! After a small talk at the cofee machine, a start-up decides to put trust in you for their website creation. The last intern, a designer, has made mockup with photoshop (.psd) for smartphone, tablet, and desktop.

Your today's job is to integrate this mockup, and publish it online if possible.

You have 6 hours to accomplish this mission.

Off course your favorite teacher is there the whole day to help you whenever you need to :)

📄 Dreamshare_Landing.zip 28817.2KB

▼ First steps 1 : Where to start ?

1. Visualize psd using Adobe XD
2. Download the assets (images) you need from the desktop version (bigger images).

   📄 images.zip 1836.7KB

3. First create the HTML.
4. Then work FIRST with the CSS (or SCSS/SASS) on the MOBILE version.

   ▼ Hints

   - Are some external ressources required ? fonts maybe ?
   - DreamShare and Login/Signup are part of the header
   - Sign Up round border is the hover effect that also apply to "Log In"
   - All images can be put as background image with a cover size and a center position
   - In order to position the text at the bottom of the card you have to give a defined size to the card and apply a flex direction vertical and justify the content to the end.
   - Keep it simple and work section per section.
   - When lost, ask the senior for hint, advice or solution.

5. Add the Tablet version thanks to media-query (break point 768px)

   https://xd.adobe.com/view/ed1edf76-b41a-4c2b-8d0e-00232dd0c64b-b84d/

6. Then do the desktop version with a media-query (break point 940px)

   https://xd.adobe.com/view/273c7b15-c391-4827-7548-30388fc8ad80-510d/specs/

7. Comment and indent your code.
8. Well done

▼ Second exercices

The startup has talked to a big company.

She has just contacted you and offered you a harmonization of the digital CVs of her collaborators.

 A model has been designed and your work is to ** integrate ** it.

The basic information (name, first name etc.) will then be adapted by each collaborator using the comments in your code.

You must integrate the model of your developer Adrian Oliver. Mobile phones and tablets have been designed for your overall vision of the project.

A senior developer will always be available for * any questions * that will come to you.

Mobile

Tablette

Desktop

Visionner les "blocs" pour bien remplir votre contenu.

Voyez vous comme le contenu principal de votre page est centré et contenu sur deux sections en colonnes ?

Quelles sont les éléments qui se "déplacent ensemble" entre les aperçus desktop, tablette et mobile ?

Quels éléments composent votre header ? main ? footer ?

Avez-vous fait attention au détails ? les lignes en haut, le boutons TOP ?

Dans un premier temps, ignorez les styles des parties "contacts details" et "technical skills" qui seront considérées comme des listes.

Pour la photo considérez votre image comme aplanie : Prenez donc le dossier le plus avantageux.

...A completer en fonction des questions...

▼ Third Exercice

LAMBDA

Home   About   Igredients   Menu   Reviews   Reservations

the right ingredients
for the right food

BOOK A TABLE   SEE THE MENU

Just the right food

If you've been to one of our restaurants, you've seen – and tasted – what keeps our customers coming back for more. Perfect materials and freshly baked food, delicious Lambda cakes, muffins, and gourmet coffees make us hard to resist! Stop in today and check us out!
